3. Ensure a safe and healthy environment

Always discuss this beforehand, explaining what you are doing and why.

Youth Empowered: To be a Science Eco-Ambassador for AI Project

Plastic Free Seas 無塑海洋 | <http://www.plasticfreeseas.org/>

Description: Hong Kong's beaches and seas are facing a pollution crisis. More than 40 million single-use plastic bottles are discarded in HK every week. Plastic food packaging, polystyrene boxes, straws, disposable masks, and more are polluting our beaches.

Facing such challenges, we are calling for your support in building artificial intelligence (AI) to create an open-source model for trash detection by simply taking photographs of the most common items found at beaches. In order to teach AI to identify rubbish, it takes about 2,000 labelled pictures of each item!

You will make a direct contribution to this valuable project simply by using your camera or phone, and a computer!

What you need to do:

- Step 1:** Take pictures of rubbish on the beach (e.g. aluminum can, plastic bottle, straw) as per the instructions
- Step 2:** After taking your photos, do a clean-up as you go. All you need is a pair of gloves and a bag. Be sure to leave your rubbish bag in a rubbish bin. You can recycle clean plastic bottles and metal cans in a recycle bin. (Take around 1 hour for Step 1 & 2)
- Step 3:** Upload your photos directly from your phone (when connected to wifi).

Remarks: After signing up for this service, please follow the instructions on the email and complete the service at your favorite beach within 10 days of signing up. You DON'T need to follow the stated dates and times listed in the Calendar-only set for registration and tracking your service hours.
